

Local Government

Pedigree of local government working ensures we deliver relevant solutions that realise efficiencies and best value

Imerja has a strong pedigree of working with local government authorities in close partnership to provide a comprehensive range of professional, technical, support and management services.

Working with both district and borough authorities, Imerja has delivered a variety of projects including the design, implementation and commissioning of complex IT infrastructure and security solutions, support and management of business class IT communications systems, bespoke managed services and also provided expert advice on strategic planning and policy development, as well as tactical support across its portfolio of services.

Imerja remains a trusted advisor to its local government customers providing a flexible approach to working in partnership on critical and high profile projects.

With a commitment to developing and delivering relevant services to the local government sector, Imerja's customer base has grown through strong account management and a willingness to remain flexible to the changing demands of the customer's business requirements.

London Borough of Redbridge Council – network and security infrastructure upgrade, onsite maintenance and support, business continuity services, complex hosting, managed services

Warrington Metropolitan Borough Council – security infrastructure deployment and support, technical consultancy and Government Connect 'Code of Connection' support

St Helens Metropolitan Borough Council – comprehensive LAN and WAN monitoring, management and maintenance, security infrastructure deployment and support, technical consultancy and design services

Lancashire County Council – end point security, maintenance and support, technical consultancy

IT in step with your
business

In addition to long standing partnerships within local government, Imerja also works with key central government bodies and projects which help to underpin its position as a knowledgeable partner able to identify relevant solutions for its local government customers in the context of the challenges they face.

Several engagements with the Government Connect (GC) Programme, including Technical Design Authority, has provided Imerja with an in-depth understanding of objectives and challenges that need to be overcome to effect secure communication between local and central government, and the specific compliancy requirements in the GCSx Code of Connection.

As the compliancy landscape continues to evolve and develop, Imerja works with local authorities to ensure they remain compliant and realise best value from their investment in developing secure connectivity.

“The seamless implementation stands as testament to Imerja’s partnership approach and technical expertise - they consistently demonstrate flexibility and commitment through every aspect of our working relationship.”

Information Services Director
Sefton Metropolitan Borough Council

“Throughout the project Imerja demonstrated a thorough understanding of the Council’s ICT requirements, and worked closely with us to design and implement a solution that has improved performance and reduced operational costs.”

Head of ICT
London Borough of Redbridge Council

At Imerja we believe that our skills diversity, integrity and flexibility all combine to create a unique proposition that offers our customers services of exceptional value.

We have already invested in developing complex hosting and a broader managed service capability in anticipation of changing market demands, and we are already working with a number of local authorities to help them improve business efficiencies and realise cost savings, including hosting ‘hot standby’ disaster recovery solutions and comprehensive managed services that provide a single help desk for all data and voice support calls.

To find out more how Imerja can work with your organisation and find the best solutions to fit your requirements please contact us or email info@imerja.com.
